In Article 1. General Provisions, Rules and Definitions, add the following terms and definitions in the appropriate location alphabetically:

- **Mixed housing types.** Any combination or required mix of townhouses (also called rowhouses and attached homes), two-family dwellings, single-family zero lot-line dwellings (also called patio homes), single-family attached or detached dwellings surrounding a small court, and/or other moderate density multi-family dwellings in a manner which provides for efficient use of land, housing choice, and is compatible with surrounding development.
- **Bio-retention swale.** A shallow, vegetated, landscaped depression typically along roadways and other impervious areas and designed to capture, treat, and filtrate stormwater runoff.
- **Constructed wetland.** A treatment system that uses natural processes involving wetland vegetation, soils, and their associated microbial assemblages to improve water quality.
- **Façade, primary.** The facade of a building fronting a street or formal open space.
- **Façade, secondary.** The side facade of a building. Side facades that face a street or formal open space shall be considered a primary façade.

- **Paver blocks.** Solid blocks made of a variety of materials that individually set with space between them. When joints are filled with sand or pea gravel, the blocks allow some filtration reducing stormwater sheet flow.
- **Pervious asphalt/concrete.** A porous paved surface that reduces stormwater runoff by filtrating water through the paving material.
- **Planting strip trench.** A gently sloped vegetated area within a street right-of-way that channels and filtrates stormwater runoff. A planting strip

trench is typically grassed but may also include native grasses and street trees.

- **Rain garden.** A depressed planted area in the landscape that collects rainwater from a roof or driveway and infiltrates it into the ground.
- **Retention hollow.** A series of small, interconnected depressions with a natural aesthetic that collect stormwater and slowly release measured amounts through the system.
- **Single-family dwellings, zero lot-line (syn. patio homes).** A detached residential building with one dwelling unit and one wall placed on the property boundary line.
- **Two-family dwellings.** A residential building with two dwelling units separated vertically or horizontally with fire-rated construction per applicable building codes.
